

Therma-Tru expands ADA-compliant door offering, ideal for multi-family dwellings

[MAUMEE, OHIO, Jan. 28, 2022–] Ideal for multi-family new construction and remodeling, Therma-Tru’s popular 8’0” Smooth-Star flush-glazed full-lite door has been redesigned with an elevated bottom rail to meet ADA requirements.

Doors with an elevated bottom rail feature a minimum 10” net smooth surface as measured from the bottom of the door slab to the beginning of the panel detail. For ADA compliance, the door must be at least 3’0” wide.

“We’re proud to expand our offering of ADA-compliant door styles, and provide more options for multi-family dwellings,” said Mark Ayers, senior vice president of marketing and product development for Therma-Tru.

The redesigned door delivers a durable on-trend solution for patio and back of home entries in multi-family dwellings. The flush-glazed glass features clean lines and seamless construction with double- or triple-pane glass built directly into the door with a high-performance dual adhesive weather seal.

Smooth-Star doors feature crisp, clean contours and long-lasting fiberglass skins that won’t dent or rust like steel.
