Conforms to ANSI Z400.1-2004 Standard (United States, Canada).

Material Safety Data Sheet

Therma-Tru Finishing Kit Stain (Cedar, Cherry, Lt Oak, Mahogany)

The Most Preferred Brand in the Business"

1. Product and company identification

Common name	: Therma-Tru Finishing Kit Stain (Cedar, Cherry, Light Oak, Mahogany)
Trade name	: Cedar Stain, Cherry Stain, Light Oak Stain
Code	: MATT12LO, MATT12CD, MATT12CH, MATTMH MATT8LO, MATT8CD, MATT8CH, MATT8MH MATTQLO, MATTQCD, MATTQCH, MATTQMH MATTGLO, MATTGCD, MATTGCH, MATTGMH MAFSPAK
Material uses	: Stain coating for fiberglass doors.
Supplier/Manufacturer	: Therma-Tru Corporation 108 Mutzfeld Road Butler, IN, 46721
In case of emergency	: CHEMTREC, U.S.: (800) 424-9300 International: (703) 527-3887

2. Hazards identification

Physical state	4	Liquid.	
Odor	1	Hydrocarbon. [Slight]	
Color	4	Various	
Hazard status	:	This material is classified hazardous under OSHA regula WHMIS Controlled Product Regulation in Canada.	ations in the United States and the
Emergency overview	1	WARNING !	
		COMBUSTIBLE LIQUID AND VAPOR. CAUSES EYE A CAUSE ALLERGIC SKIN REACTION. CONTAINS MAT TARGET ORGAN DAMAGE. CANCER HAZARD - CON CAUSE CANCER.	ERIAL THAT CAN CAUSE
		Keep away from heat, sparks and flame. Avoid exposur before use. Do not breathe vapor or mist. Do not get or with eyes. Contains material that can cause target organ which can cause cancer. Risk of cancer depends on du only with adequate ventilation. Keep container tightly clo use. Wash thoroughly after handling.	n skin or clothing. Avoid contact n damage. Contains material ration and level of exposure. Use
Potential acute health effects			
Eyes	1	Irritating to eyes.	
Skin	1	Irritating to skin. May cause sensitization by skin contact	
Inhalation	:	Exposure to decomposition products may cause a health delayed following exposure.	n hazard. Serious effects may be
Ingestion	1	No known significant effects or critical hazards.	
Potential chronic health effects	:	CARCINOGENIC EFFECTS: Classified A3 (Proven for a (Petroleum), Hydrotreated Light]. Classified None. by NI A4 (Not classifiable for humans or animals.) by ACGIH (Known to be human carcinogens.) by NTP, + (Proven.) quartz]. Classified A2 (Suspected for humans.) by ACG IARC [Silica crystalline, quartz]. Classified A4 (Not classifiable ACGIH [Aluminum Oxide]. Classified A4 (Not classifiable ACGIH, 3 (Not classifiable for humans.) by IARC [iron(iii) classifiable for humans or animals.) by ACGIH [Kaolin].	OSH [Barium sulfate]. Classified [Barium sulfate]. Classified 1 by NIOSH [Silica crystalline, IH, 2A (Probable for human.) by ifiable for humans or animals.) by for humans or animals.) by)oxide]. Classified A4 (Not

4. First aid measures

Eye contact	 Check for and remove any contact lenses. In case of contact with eyes, rinse immediately with plenty of water. Get medical attention.
Skin contact	: In case of contact, immediately flush skin with plenty of water for at least 20 minutes. Get medical attention.
Inhalation	: If inhaled, remove to fresh air. If not breathing, give artificial respiration. Get medical attention.
Ingestion	: Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention.
Notes to physician	: No specific antidote. Medical staff must contact Poison Control Center.

5. Fire-fighting measures

Flammability of the product	: Combustible
Products of combustion	: Decomposition products may include the following materials: carbon oxides nitrogen oxides sulfur oxides metal oxide/oxides
Extinguishing media	
Suitable	: Use dry chemical, CO ₂ , water spray (fog) or foam.
Not suitable	: Do not use water jet.
Special exposure hazards	: No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
	Combustible liquid In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal precautions		No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8).
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up		Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal.

7. Handling and storage

Handling

: Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in

Therma-Tru Finishing Kit Stain (Cedar, Cherry, Light Oak)

use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage

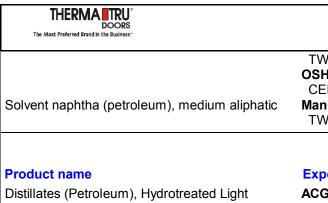

: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

United States

Manganese dioxide	ACGIH TLV (United States, 1/2006). TWA: 0.2 mg/m ³ , (as Mn) 8 hour(s). NIOSH REL (United States, 12/2001). STEL: 3 mg/m ³ , (as Mn) 15 minute(s).
	 NIOSH REL (United States, 12/2001). TWA: 5 mg/m³ 10 hour(s). Form: Respirable fraction TWA: 10 mg/m³ 10 hour(s). Form: Total OSHA PEL (United States, 11/2006). TWA: 5 mg/m³ 8 hour(s). Form: Respirable fraction TWA: 15 mg/m³ 8 hour(s). Form: Total dust
Barium sulfate	TWA: 10 mg/m ³ 8 hour(s). Form: Dust TWA: 5 mg/m ³ 8 hour(s). Form: Respirable fraction ACGIH TLV (United States, 1/2006). TWA: 10 mg/m ³ 8 hour(s).

Engineering measures	other engineer recommended	adequate ventilation. Use process enclosures, local exhaust ventilation or ing controls to keep worker exposure to airborne contaminants below any I or statutory limits. The engineering controls also need to keep gas, vapor atrations below any lower explosive limits. Use explosion-proof ventilation	
Eyes	: Safety glasses	S.	
Skin	: Lab coat.		
Respiratory	: A respirator is	not needed under normal and intended conditions of use.	
Hands	: Natural rubbe	r (latex).	
	Dor		
HMIS Code/Personal protective equipment	: B		
Personal protection in case of a large spill Hygiene measures	approved self- : Wash hands, f	e, goggles or face shield. Impervious gloves. Full suit. Boots. Wear NIOSH- contained breathing apparatus or equivalent and full protective gear. Forearms and face thoroughly after handling compounds and before eating, asing the lavatory and at the end of the day. Follow good industrial hygiene	

THERMA TRU DOORS

9. Physical and chemical properties

Physical state	: Liquid.
Flash point	: Closed cup: 49°C (120.2°F) [Pensky-Martens.]
Auto-ignition temperature	: 540°C (1004°F)
Color	: Various
Odor	: Hydrocarbon. [Slight]
Relative density	: 0.99
Vapor pressure	: 0.27 kPa (2 mm Hg)
Vapor density	: 4.8 [Air = 1]
Evaporation rate	: 0.92 (Butyl acetate. = 1)
VOC	: 395.44 (g/l).
Viscosity	: Dynamic: 20 to 100 mPa·s (20 to 100 cP)
Solubility	: Insoluble in the following materials: cold water and hot water.

10. Stability and reactivity

Stability and reactivity	: The product is stable.
Incompatibility with various substances	 Reactive or incompatible with the following materials: oxidizing materials, reducing materials, combustible materials and acids.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous polymerization	: Will not occur.
Conditions of reactivity	 Flammable in the presence of the following materials or conditions: open flames, sparks and static discharge. Slightly flammable in the presence of the following materials or conditions: heat.

11. Toxicological information

	Toxicity data				
Product/ingredient name	Test / Route	Species	Result		
Manganese dioxide	LD50 Oral	Rat	3478 mg/kg		
Acute Effects					
Eyes	: Irritating to eyes.				
Skin	: Irritating to skin. May cause sensitiza	ation by skin contact.			
Inhalation	: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.				
Ingestion Potential chronic health effects					

MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available.

Target organs

: Contains material which causes damage to the following organs: blood, kidneys, lungs, the reproductive system, liver, upper respiratory tract, skin, central nervous system (CNS), eye, lens or cornea.

12. Ecological information

Ecotoxicity data				
Product/ingredient name Distillates (Petroleum), Hydrotreated Light Barium sulfate	Species Fish Daphnia	Test Mortality Intoxication	Exposure 96 hours 48 hours	Result Acute LC50 2.9 mg/L Acute EC50 32 mg/L
Environmental precautions: No known significant effects or critical hazards.Products of degradation: Products of degradation: carbon oxides (CO, CO2) and water, nitrogen oxides (NO, NO2 etc.), sulfur oxides (SO2, SO3 etc.). Some metallic oxides.				

13. Disposal considerations

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
